CSE4421: Lab 3

Burton Ma

Wed 10 Feb, 2010

1   Preliminaries

This lab teaches you the basics of Matlab and the Matlab A150 interface.

2   Matlab

Log on to a workstation and create a directory for this lab somewhere under your account. Change to the created directory and copy all of the lab files into your directory:

```
cp /cs/dept/www/course_archive/2009-10/W/4421/src/matlab/* .
```

Start Matlab by typing `matlab &` in the console.

When Matlab starts, open the file `demobasics.m`. I'll explain what to do next.

There are two other demo files to work through: `demofunc.m` and `demo150.m`.
